

**Numerical index of Philips and Norelco typenumbers in Database of Bram Porrey.
This method is used by the 'Philishave Verzamelaars Club' (1990-2023)**

Typenumber: Philips typenumbers with official version numbers after the / 'slash'.

Additions like study, proto, etc. are made by the author of the catalogue.

Design group = combines products with different typenumbers but with the same basic design in one group.

The year is related to the introduction (or study) of the first version.

shaving system: number of shaving heads + typenumber or product code.

Introduction: Year of introduction or study of the related typenumber.

m = introduction on the market). p = production start. s = study. spec = specification made.

All data are given to the best of the author's knowledge, but without any guarantee.

total number of records > 2288 records

Van Bram Porrey aan verzamelaars van Philishave scheerapparaten:

De Philips scheerapparaten zijn door mij per typenummer vastgelegd in een databestand (MS Access).
Om de productgegevens snel te kunnen vinden heb ik voor verzamelaars 3 index lijsten gemaakt.

1. Alfnumeriek, dus numerieke volgorde binnen de lettercombinaties die Philips toepast.
Prima als het complete typenummer bekend is en je wilt weten of dat in het databestand voorkomt.

2. Chronologisch per modelgroep. Mijn favoriete systeem.
Typenummers met een gemeenschappelijk kenmerk (meestal model) zijn per groep gebundeld.
Deze methode volgt de tijdlijn van ontwikkeling en marketing.
Het jaartal van de groep is gebaseerd op het jaar waarin het betreffende model werd geïntroduceerd.
Per typenummer wordt het eigen jaar van introductie/productie of studie vermeld.
Ook een goede referentie als alleen het model of het jaar bekend zijn.

3. Numerieke volgorde. Niet fraai, maar handig als van het typenummer alleen het getal bekend is.

TYPEnumber

year of BP-typecode file - designgroup code

year of introduction or study

shaving system/product code

0001
